Inveni David Servum Meum

Offertory for the Feast of Saint Sylvester, Dec. 31

Mikołaj Zieleński ca. 1550-1615
edited by David Millard

  The present score is intended for use with the Éditions Doulce Mémoire version of Zieleński's *Inveni David Servum Meum.* It constitutes a conflation of the four-stave *partitura pro organo* part for a single player and has been transposed a tone higher than the original for those who wish to perform it thus. I have included a vocal cue line consisting of the top line from each choir for ease of reference.

  The registration should be a light, singing principal chorus. On instruments with heavy principals, a clear 8' chimney flute is a better choice for the foundation, with a clear 4' præstant for brightness. A 2' superoctave is suitable if not too prominent. A light manual 16' bourdon or Quintadena may be added for gravitas. If pedal is used, it should be coupled from the manual with no additional stops.

  I haven't tried to make the part completely idiomatic for the keyboard. The player should feel free to drop or redistribute notes as needed.
