Editorial notes

Source: *Missarum Libri Duo (...)* / Domenico Basa, Rome, 1583.

Originally notated a minor third lower in the following clefs: C1, C3, C4, F4.

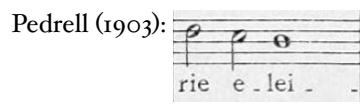

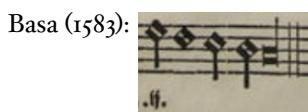

Note-values halved; quartered in *tripla*.

Cue-sized and cautionary accidentals are editorial.

Chant provided by the editor.

Credo omitted.

Domenico Basa's print (Rome, 1583) brings a couple of matters to our attention – text underlay in the Kyrie, a corruption of the Tenor's penultimate bar in Kyrie II (b. 37 – see below), possibly copied from Pedrell's 1903 transcription, and repeated in several editions freely available on the internet, and the application of *musica ficta* in bar 11 of the Benedictus.

Musica ficta:

The notation of accidentals in Domenico Basa's edition is clear, comprehensive, and representative of the trend in late sixteenth-century publishing to sign many leading-notes, particularly those which singers may not naturally have felt inclined to supply themselves, e.g. mid-phrase cadences. Indeed, Victoria's works are well-served in this matter, not least because of his involvement in their publication, returning with revisions to second editions, especially in the multi-voice psalm settings. This Mass was only printed once, and yet the question remains whether or not to raise the *Cantus* part's final note in bar 11 whilst leaving the *Altus* unaltered, thereby causing a false relation. If one wishes to purge the counterpoint of dissonance according to the received wisdom on its stylistic aims, then the solution is relatively straightforward. However, false relations are not unheard of in Victoria's works. (Bar 16 in his eight-voice *Ave Maria* is a notable example.) In my view, there is no reason why the *Cantus* should not mirror the *Bassus* in bar 5 and the *Altus* in bar 7. If Victoria had wished to avoid a clash in bar 11, we should feel certain that he would have ensured it was clearly notated.

Text:

Transcription of the text in the *Kyrie* is faithful to Basa's edition which is very clear in its placement of syllables; not often the case in sixteenth-century editions. It is arguable that singers (Italians in particular) would have treated *eleison* as a three-syllable word even if its second syllable falls on the penultimate note of a phrase. I have taken the liberty of making this clear by isolating the *i* when the penultimate note is a crotchet (a minim in the original edition). Of course, it is possible to elide the words in many phrases, e.g. *Kyri(e) eleison*, so that all voices are more or less consistent with one another, as in Henry Washington's fine and venerable edition made at the London Oratory in 1958, but I am not convinced this approach was expected of sixteenth-century singers.
